### INNOVATIVE PRODUCTS

#### ULTRASONIC BONE CUTTER (Minimally Invasive System)

A revolutionary product of bone dynamics

Bone cutting does not hurt soft tissues  
Accurate, safe, efficient and hemostasis

#### ULTRASONIC BONE DRILL

A disruptive and innovative surgical tool that replaces traditional drills

Bone drilling does not entangle soft tissues  
Compound power, precision drilling

#### ULTRASONIC ASPIRATOR

Exclusive product in China

Removing tumor does not hurt the nerves

Accurate, Less bleeding, No burns

#### ULTRASONIC HEMOSTATIC SHEAR

Successfully developed in 2006

Handpiece unlimited use time  
Disposable and reusable constables

#### ULTRASOUND BIPOLAR SYSTEM

Innovative products for soft tissue excision

Ultrasonic and electrocoagulation perfectly combined

Both energy modes can be output at the same time

### SONICMED MEDICAL

Beijing Sonicmed Technologies Co., Ltd. was established in 2007 with a dedicated focus on the research, development, and commercialization of ultrasonic medical equipment. The company offers a diverse portfolio of ultrasonic products, including advanced surgical systems, and holds numerous patents alongside leading-edge technologies in this domain, reflecting its substantial expertise and capabilities.

Aiming to position itself as a global, group-oriented, modern, and international provider of surgical solutions, Sonicmed is committed to continuous investment in technological innovation and product development. The company strives to set industry standards, delivering efficient and safe medical solutions to enhance global healthcare. Over the past decade, Sonicmed has reached several high-tech milestones, backed by independent intellectual property rights, and has received multiple international awards. These achievements have significantly strengthened the company's technological foundation and fostered impactful advancements within the medical industry.

Sonicmed places a strong emphasis on the needs of surgeons, operating under the mission of "Committed to Medical Progress, Focused on Surgeon Services". In collaboration with various hospitals, the company has established academic centers that promote the integration of ultrasonic energy platforms into clinical practice. Furthermore, Sonicmed regularly organizes training programs for medical professionals, contributing to the advancement and innovation of surgical techniques and markedly improving surgical outcomes. Technical specialists are readily available to provide timely and expert support during surgical procedures.

Looking to the future, Sonicmed will leverage its robust R&D capabilities and clinical service network to drive further technological innovation and product integration. The company plans to deepen partnerships with both domestic and international medical institutions and research centers, undertake additional cutting-edge research initiatives, and actively pursue expansion into international markets. Through these initiatives, Sonicmed is dedicated to delivering cutting-edge technology to the global market.
